

CV

Andreev Roman Andreevich, born in 05.01.2004 in Saint Petersburg, Russia. The student of 2 course of the St.-Petersburg State University, speciality "Software engineering".

I know Russian fluent and English at level A2-B1.

Personal qualities: Purposeful, communicative, ready for changes, easily trainable, can work alone or in a team.

About me: all my life I am engaged in sports, I like to read and develop, I travel.

I have been doing programming for more than 2 years. During the year, to pass the exam, I studied the Python programming language. After entering the university I have been studying C programming language for half a year and C# for another half a year.

In C, I worked with binary operations, wrote different data structures, such as: unilinear list, binary tree.

In C# I implemented the core of a small RPG game, worked with exceptions and Unit-tests, developed an application in Windows Forms and Xamarin, implemented a Bash analog with reduced functionality and worked with web-development and API-requests.
